

The New Year Began with Science

On January 1, Juche 105 (2016) the respected Comrade **Kim Jong Un** attended the inauguration ceremony of the Sci-Tech Complex, a great temple of all-people learning in the new century.

The construction of the Sci-Tech Complex, a source of pride in the eyes of the world, where anyone can study to their heart's content, was a great event that showed the people's strong desire to possess advanced science and technology as well as a victory of the Workers' Party of Korea's policy of attaching great importance to the development of science and technology, a major key to achieving victory in the building of a powerful nation.

The participants in the inauguration ceremony raised cheers for **Kim Jong Un** who was on a visit to the complex on the first day of the New Year giving momentum to the effort to make all the people well versed in science and technology.

After cutting the ribbon amid loud cheers from the participants, he was guided into the building.

Looking round the complex, he called it a great temple of all-people learning, saying that as hub of the latest scientific and technological dissemination, the complex was embodying the plan of the Workers' Party of Korea. And he noted that the New Year began with science, the year in which the Seventh Congress of the WPK would be held.

His words reflected his will to push forward with the building of a prosperous country by dint of science and technology.
